

## STEP 1: Download the SAS® Mobile BI application from Google Play on your Android device

*Note: the SAS Mobile BI app for Apple devices is available on iTunes.*

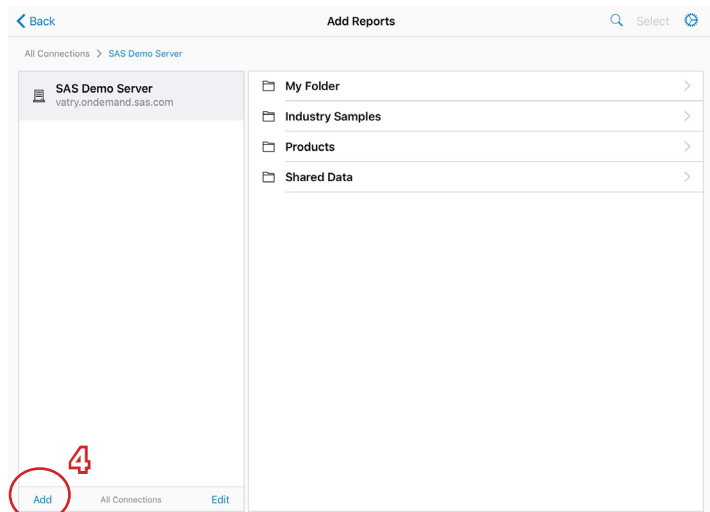

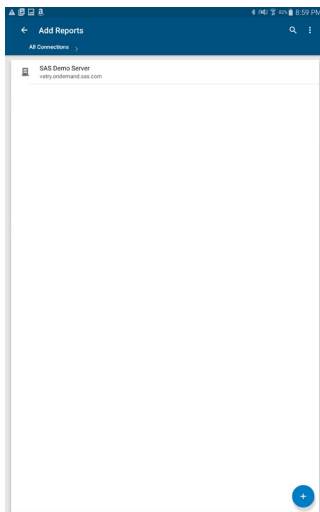

- 1) Click here to install the SAS® Mobile BI app, the third-party application that allows you to connect to UT System data.

**\*When you open the app, there will be example reports available. These are not UT System reports. You must connect to the UT System server in order to download the UT System reports.**

## STEP 2: Connect to the UT System server

- 3) Tap the <ADD REPORTS> button located beneath the “Get Started with SAS Mobile BI” prompt.
- 4) Tap <Add> in the bottom left of the screen.

5) Enter Add Connection information and then tap <Next>.

Server (case-sensitive): **exploredata.utsystem.edu**

Port: **433**

Secure connection should be **ON**

The screenshot shows the 'Add Connection' screen with the following fields:

Add Connection	
Connection	
Server	exploredata.utsystem.edu
Port	443
Secure connection	<input checked="" type="checkbox"/>

6) Switch Authentication “Log on as guest” to **ON**, then tap <Next>.

The screenshot shows the 'Add Connection' screen with the following fields:

Add Connection	
Connection	
Server	exploredata.utsystem.edu
Port	443
Secure connection	<input checked="" type="checkbox"/>
Authentication	
Log on as guest	<input checked="" type="checkbox"/>
Miscellaneous	
Description	guest@exploredata.utsystem.edu

7) exploredata should now appear in your “All Connections” list. Tap <guest@exploredata...>.

The screenshot shows the 'Add Connection' screen with a success message: "Server connection is complete. The connection was successfully added." Below the message is a list of connections:

Add Connection	
Server connection is complete. The connection was successfully added.	
All Connections > guest@exploredata.utsystem.edu	
guest@exploredata.utsyst... exploredata.utsystem.edu	>
SAS Demo Server vatry.ondemand.sas.com	>

### STEP 3: Accessing Reports

8) If returned to “Subscriptions” page, tap <Add> in the top left of the screen.

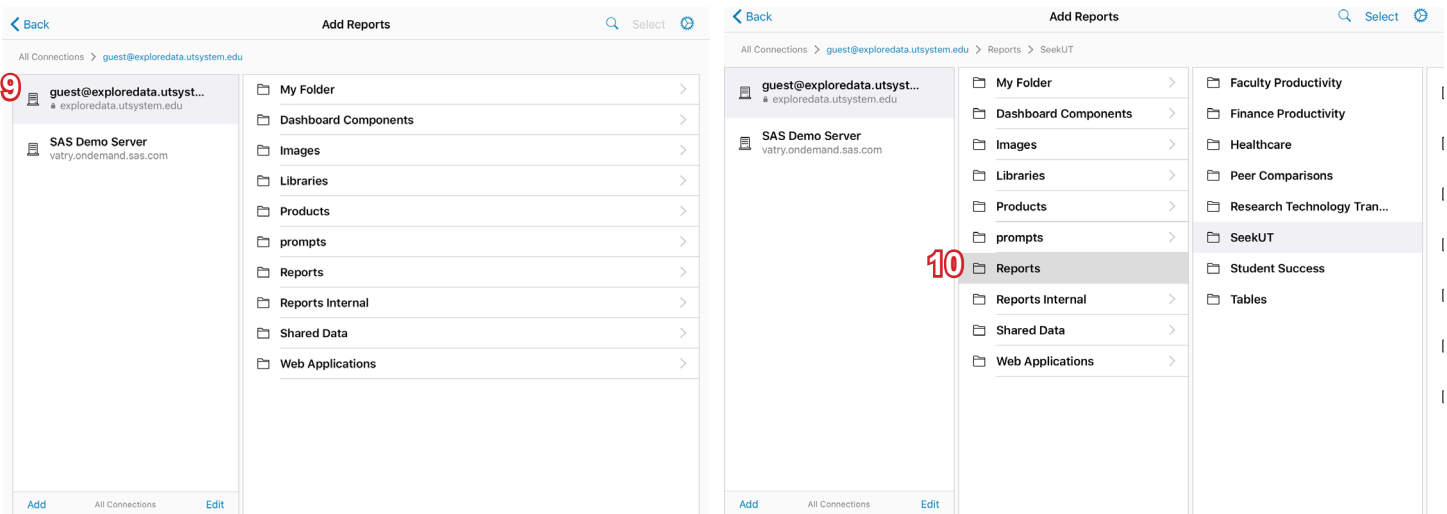

The screenshot shows the 'Subscriptions' page with the following elements:

- Top bar: Add (circled in red), Subscriptions, Select
- Sort by: Most Recently Viewed
- My Subscriptions (2)
- Subscription 1: seekUT\_grad, July 6, 2017
- Subscription 2: seekUT, July 14, 2017

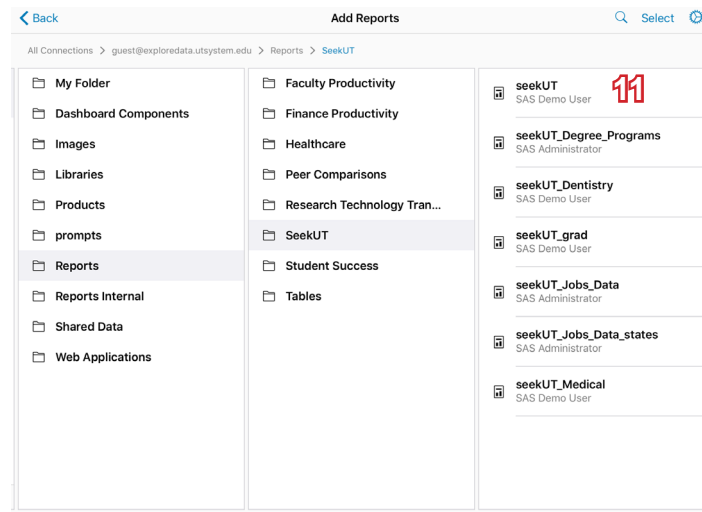

9) Within the “All Connections” list, tap <guest@exploredata.utsystem.edu>

10) Tap <Reports> from the sub-folders on the right, then select a sub-folder topic.

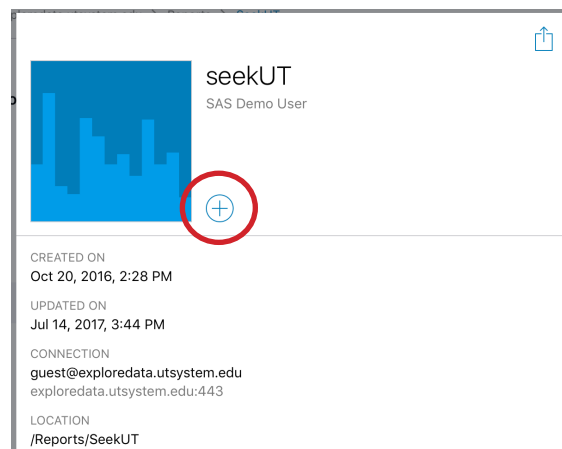

**\*Swipe left and right between folders if needed.**

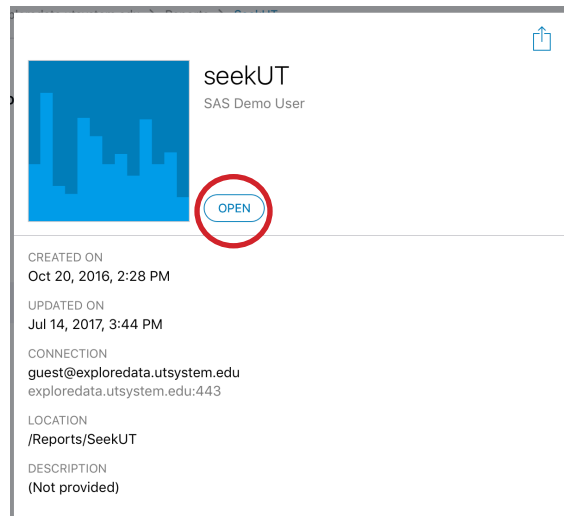

11) The available reports for topic will be listed. Select a report.

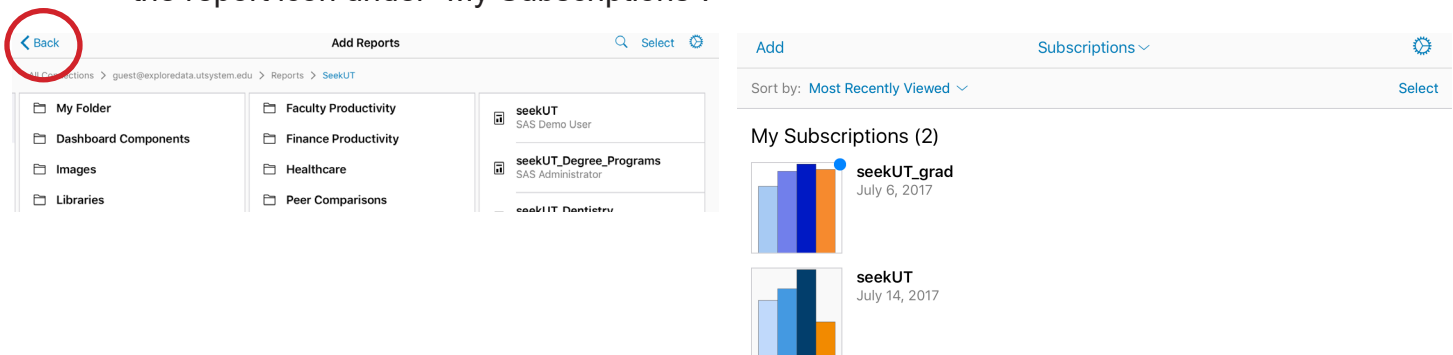

12) A pop-up will appear. You must press the  button to subscribe to a report. Subscribing to a report downloads it to your device.

13) To view the report you have subscribed to, select the report from the folder, then select the <OPEN> button from the pop-up.

14) To view all of your reports you have subscribed to, tap <Back> to go to your “Subscriptions” page. Here you can access the reports you have subscribed to by tapping on the report icon under “My Subscriptions”.

You will be notified in “Subscriptions” when a report has been updated and changes are available for download.

Use “Subscriptions” to access reports that you have subscribed to and to download updates.

Tap “Add” to access the “Connections” and “Add Reports” list, to look for new reports.
